To whom it may concern

Prins Autogassystemen B.V. Holland, represented by commercial director Mr. Bart van Aerle is our key supplier of LPG conversion systems. Although young co-operation, preliminary preparation started in Autumn 2003, till today a few hundreds of VSI (vaporized sequential injection) were sold to Toyota customers via Toyota Motor Poland network channels. Apart of the regular sale to our dealers, VSI systems were used to convert a few dozen of our flag model Land Cruiser 120 on a port of entry base. Main benefit of the Prins Autogassystemen B.V offer is a full concept of cooperation, that includes attractive prices and warranty service conditions – full conformity to new cars warranty.

All LPG systems are designed and configured to particular Toyota models. Offered logistic solutions allows to keep stock at low level.

Furthermore, Prins Autogassystemen B.V. provides regular technical and commercial trainings for technicians and salesman regarding VSI systems, and also refreshing courses for TMPL's dealers staff.

Prins also shares the responsibility for accordance to polish law and all homologation approvals required by ITS / EU.
